

SOFTWARE REQUIREMENTS SPECIFICATION (SRS)

Project Title: Debt Assistance CRM System with Customer Portal & Financial Management

1. Introduction

1.1 Purpose

This system is designed to build a **centralized CRM platform** for managing the end-to-end lifecycle of customers seeking loan/debt assistance, including:

- Lead acquisition and conversion
- Debt analysis and resolution workflows
- Assistance fee calculation and tracking
- Expense tracking and profitability analysis
- Customer self-service portal for transparency

1.2 Scope

The system will:

- Manage complete lifecycle: **Lead → Case → Settlement → Closure**
- Enable internal teams to manage operations efficiently
- Provide a **customer login portal**
- Track **revenue (fees) and expenses**
- Generate **profitability insights**

1.3 Definitions

Term	Meaning
Lead	Potential customer
Customer	Converted lead
Case	Debt resolution engagement
Settlement	Negotiated reduced payment
Assistance Fee	Service charge
Expense	Business cost
Profit	Revenue – Expenses

2. Overall Description

2.1 Product Perspective

- Web-based CRM system
- Modular, scalable architecture
- Multi-role access
- Integrated financial tracking

2.2 Product Functions

- Lead & customer management
- Loan/debt tracking
- Case workflow management
- Fee calculation & collection
- Expense tracking
- Profit analysis
- Reporting & analytics
- Customer self-service portal

2.3 User Roles

Role	Description
Admin	Full control
Sales Executive	Lead handling
Debt Counsellor	Case management
Operations	Documentation
Accounts	Finance & payments
Customer	Portal access

3. System Modules

3.1 Lead Management

Features:

- Lead capture (manual + integrations)
- Fields:
 - Name, Phone, Email, City
 - Loan type, total debt
 - Income details
- Status tracking:
 - New, Contacted, Interested, Converted
- Lead assignment
- Follow-up reminders

3.2 Customer Management

Features:

- Personal profile
- Financial snapshot
- Risk categorization
- Linked cases
- Activity logs

3.3 Loan & Debt Management

Features:

- Multiple loans per customer
- Fields:
 - Lender name , Outstanding amount, EMI, interest rate, Overdue status

3.4 Case / Workflow Management

Stages:

1. Case Created
2. Document Collection
3. Analysis
4. Negotiation
5. Settlement Offer
6. Closure

Features:

- Case assignment
- Notes
- Timeline tracking

3.5 Document Management

Features:

- Upload/download
- Document types:
 - PAN, Aadhaar
 - Bank statements
 - Loan docs
- Verification status
- Case tagging

3.6 Assistance Fee Management

Fee Models:

- Fixed
- Percentage (based on savings)
- Hybrid
- Milestone-based

Features:

- Fee plan creation
- Assign to customer
- Auto calculation
- Installments
- Invoice generation
- Receipt tracking

3.7 Payment Tracking

Features:

- Record payments (Cash/UPI/Bank)
- Track:
 - Paid / Pending / Overdue
- Installment handling
- Receipt generation

3.8 Expense Management

Features:

- Expense categories:
 - Salaries, Marketing, Rent, Tools, etc.
- Expense entry:
 - Date, amount, category, description
- Payment mode tracking
- Case-linked expenses

3.9 Profit & Financial Management

Calculations:

- $\text{Net Profit} = \text{Fees Collected} - \text{Expenses}$
- $\text{Case Profit} = \text{Case Fee} - \text{Case Expenses}$

Features:

- Profit dashboard
- Periodic reports (monthly, custom)
- Expense breakdown
- Revenue tracking

3.10 Communication Module

Features:

- Call logs
- SMS / WhatsApp / Email tracking
- Templates
- Notifications

3.11 Task & Follow-up Management

Features:

- Task creation
- Daily reminders
- Escalations

3.12 Reporting & Analytics

Reports:

- Lead conversion
- Case success rate
- Revenue reports
- Expense reports
- Profit reports
- Employee performance

3.13 Lender Management

Features:

- Lender database
- Contacts
- Negotiation history

3.14 Customer Portal

Authentication:

- OTP login (primary)
- Email/password (optional)

Dashboard:

- Case progress
- Debt vs settlement
- Fee summary

Features:

- Loan details
- Case tracker (visual stages)
- Payment tracking
- Document upload
- Notifications
- Agreements viewing

4. User Permissions (Summary)

Module	Admin	Sales	Counsellor	Ops	Accounts	Customer
Leads	Full	Full	View	View	View	No
Customers	Full	Partial	Full	Full	View	Self
Cases	Full	View	Full	Full	View	View
Fees	Full	View	View	View	Full	View
Payments	Full	No	No	No	Full	View
Expenses	Full	No	Limited	Limited	Full	No
Reports	Full	Limited	Limited	Limited	Full	No

5. System Workflow

Lead → Qualification → Conversion → Customer Profile → Case Creation → Document Collection → Analysis → Negotiation → Settlement → Fee Calculation → Payment → Expense Tracking → Profit Calculation → Closure

6. Technology Stack

Frontend:

- React.js (PWA enabled)

Backend:

- Django + Django REST Framework

Database:

- PostgreSQL

Storage:

- AWS S3 / Cloud storage

Authentication:

- JWT + OTP

Realtime (Optional):

- WebSockets

7. Security Requirements

- Role-based access control
- HTTPS encryption
- Secure document storage
- Audit logs
- Regular backups

10. Data Model (High-Level)

Tables:

- users
- leads
- customers
- loans
- cases
- documents
- fee_plans
- payments
- invoices
- expenses

- expense_categories
- tasks
- notifications

11. **Testing Requirements**

- Unit testing
- API testing
- UI testing
- Role-based testing
- Security testing

12. **MVP Scope**

Phase 1:

- Lead management
- Customer module
- Loan tracking
- Case workflow
- Fee management (basic)
- Payment tracking
- Expense tracking
- Customer portal (basic)

Phase 2:

- WhatsApp integration
- Chat system
- Advanced reports
- eSign
- Payment gateway

13. **Risks & Considerations**

- Sensitive financial data → high security needed
- Fee calculations must be accurate
- Overengineering may delay launch
- UX must be simple for customers

14. **Future Enhancements**

- AI-based debt advisory
- Credit score integration
- Mobile app
- Automation workflows
- Accounting integrations

Final Summary

This system will act as:

- **CRM (operations)**
- **Customer Portal (experience)**
- **Revenue Engine (fees)**
- **Financial Tracker (profitability)**

 In short: a **complete business operating system for debt assistance services**
